

COMPUTER SCIENCE

COMMUNITY OF PRACTICE

Integrated Computer Science through Deeper Learning

Join us for a hybrid professional learning opportunity (PLO) in Computer Science (CS) integration through Deeper Learning! Integrated CS supports CS education across subject areas to foster creativity and critical thinking. This approach helps students understand the relevance of CS in real-world contexts and develop the ability to apply computational thinking. Whether you choose to join us in-person or virtually, you'll have the opportunity to learn from students and teachers in authentic classroom settings, engage in discussions, and create change ideas.

In-Person Experience

LEAs participating in the in-person CoP will join us in collaboration with **Val Verde Unified School District** in **Perris, CA** on **September 26**. In-person attendees will meet at the **Lake Perris Fair Grounds Event Center** to prepare for an **immersive learning experience** to observe and interact with students in elementary and secondary classroom settings.

Virtual Experience

LEAs participating in the virtual PLO will engage using the **RingCentral platform at no cost**. This PLO offers a comprehensive experience where participants can join either as a team or individually, and **will include video observations of classroom interactions** and instructional strategies to provide insights into effective CS integration.

All attendees will experience:

- **Engage:** Learn from feature speakers and host site panelists (Students, Teachers, Administrators)
- **Discuss:** Join interactive dialogue with educators and peers, fostering a collaborative environment to share ideas, challenges, and solutions.
- **Reflect:** Participate in reflective practice cycles designed to deepen understanding of CS concepts and create opportunities for growth
- **Network:** Connect with other CS educators and partners to build a supportive professional network.

Registration Information

Please see below for further information and eligibility for the in-person option.

Registration for the in-person option is designed for teams of three. Incomplete teams will not be considered for the in-person option. Teams attending the in-person experience will receive a \$5,000 stipend. County, district, and site-level educators are encouraged to register for this PLO. **Additional information can be found in the FAQ link below.**
