

# COMPUTER SCIENCE COMMUNITY OF PRACTICE: CAREER PATHWAYS & INDUSTRY PARTNERS

Join us for exciting school visits to Shasta Union and Redding Elementary!

## Building Bridges to Career and Industry

Discover strategies to amplify computer science education through career pathways, supported by insights from industry partners.

## Developing Change Ideas

Engage in immersive learning, meaningful discussions, and generate change ideas to strengthen your district's computer science program.

## Growing Community and Building Capacity

Teams of 3 participating in the in-person CoP will receive a \$5,000 professional learning stipend to support travel and resources to amplify local computer science programs.

Join us for an immersive professional learning opportunity focused on computer science **Career Pathways and Industry Partnerships!** This session will explore how strategic partnerships with community and industry leaders can provide students with real-world learning opportunities and create the conditions for exploration of CS pathways leading to high-demand careers. The **in-person Community of Practice registration is open to teams of 3** until capacity is met. **Virtual registration is open to individuals or any team-size** configuration. Both in-person and virtual registrants will have the opportunity to collaborate, engage in learning from the field, and develop action plans centered on building career pathways and industry-focused computer science programs. Don't miss this chance to create meaningful connections and drive impactful change!
